

Programming for All !

A problem-based approach

Joachim Wedekind

?

??

???

A word cloud of computer science terms. The words are arranged in a roughly rectangular shape. The largest word is 'algorithm' in a dark green color. Other prominent words include 'information' in yellow, 'computer' in dark green, 'problem' in orange, 'language' in purple, 'computation' in red, 'test' in dark green, 'data' in dark green, and 'communication' in purple. Smaller words include 'program' in yellow and 'model' in red. The background is white with a light blue shadow behind the text.

information
computer
language
computation
program
model
test
algorithm
data
problem
communication

A word cloud of problem-solving terms. The words are arranged in a roughly rectangular shape. The largest word is 'problem' in a dark brown color. Other prominent words include 'analyzing' in dark brown and 'solving/posing' in dark blue. The background is white with a light blue shadow behind the text.

problem
solving/posing
analyzing

1. Creativity
2. Abstraction
3. Data and Information
4. Algorithms
5. Programming
6. The Internet
7. Global Impact

things to learn

1. Connecting Computing
2. Creating Computational Artifacts
3. Abstracting
4. Analyzing Problems and Artifacts
5. Communicating
6. Collaborating

things to do

Big Ideas

• Variables and Scope

• Iteration

• Lists

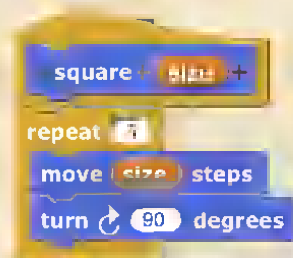

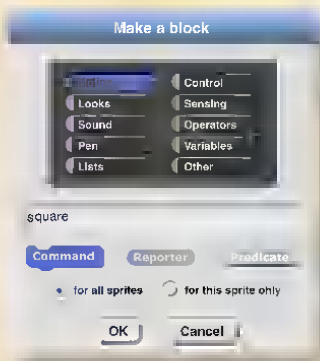

• Parallelism

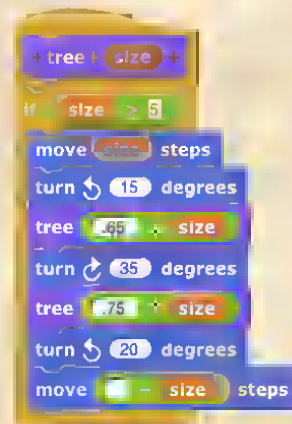

• Event Handling

• Procedures (Commands and Reporters)

• Recursion

• Functions and Lists as First Class Data

1. personally meaningful artifacts
2. big ideas

1. personally meaningful artifacts
2. big ideas
3. learning by design
(planning, implementing, rating
& revising)

1. computer graphics - animated & interactive
2. one „big idea“ - one product
3. recoding & remixing

1. computer graphics - animated & interactive

Logo classics

Digital art

Optical illusions

Logo classics

Digital art

Optical illusions

Logo classics

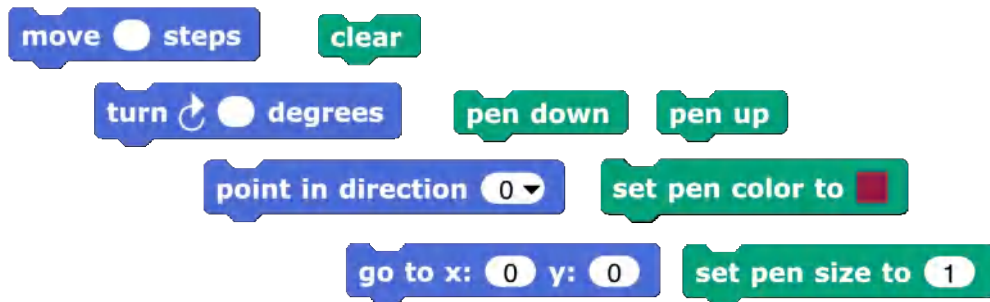

Digital art

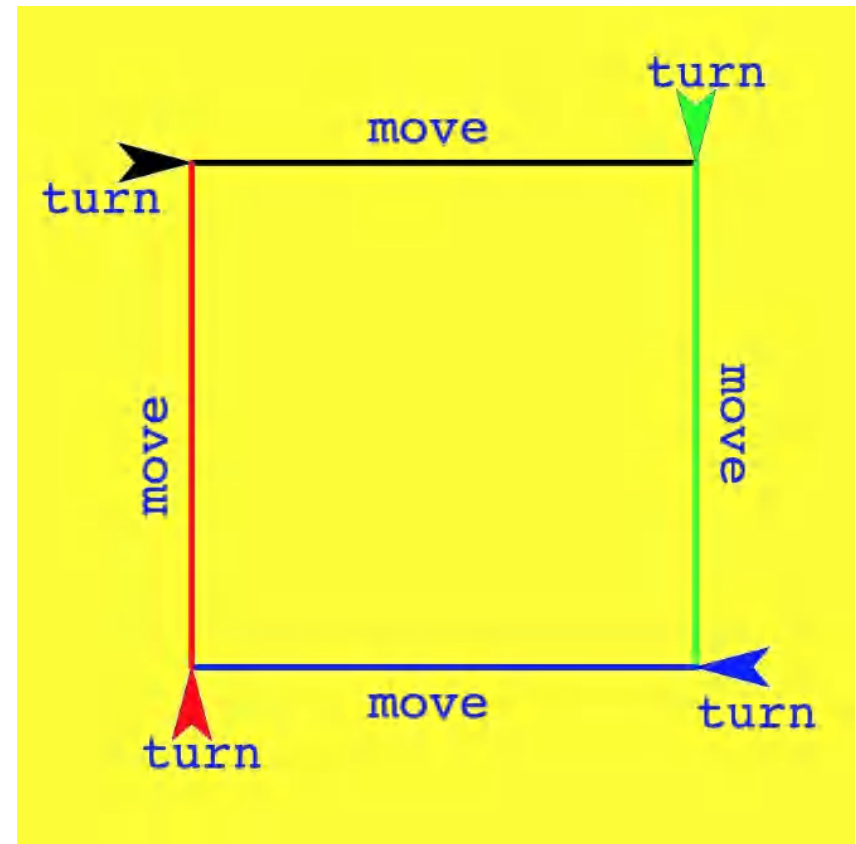

Optical illusions

2. one „big idea“ - one product

- graphics commands

Oppel-Kundt Illusion

```
repeat 11  
  pen down  
  move 200 steps  
  pen up  
  move -200 steps  
  change x by 25
```

- graphics commands
- iteration

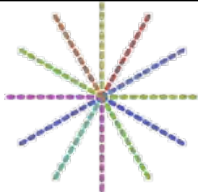

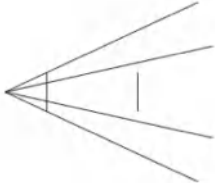

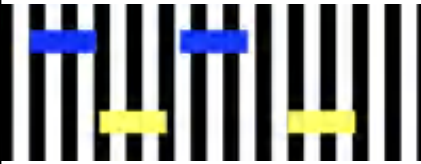

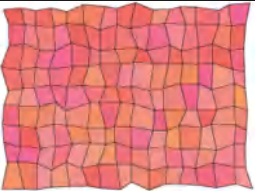

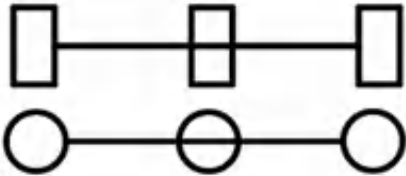

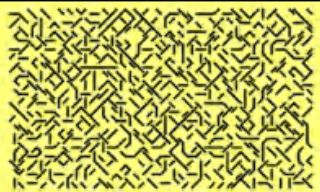

Oppel-Kundt Illusion

```
repeat n  
  pen down  
  move height steps  
  pen up  
  move -1 × height steps  
  change x by spacing
```

- graphics commands
- iteration
- variables

	Logo Classics	Opticals	Digital Art
iteration			
procedures & variables			
lists (of lists)			
recursion			
procedures as data			

3. learning by design

Think first, code second!

- which graphic elements?
- which will be animated?
- which variables can be changed

Wehrli: Tidying up Art

animation

interaction

Why Snap! ?

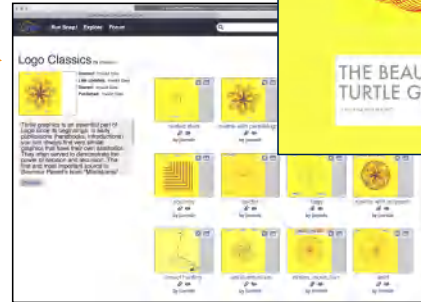

- arbitrary stage sizes
- nested sprites
- sending messages to individual sprites
- blocks libraries
- projects as executables (Snapp!)
- serious applications
